

Prerequisites for installation

| | | |
|---------------------------|-----------------------------|---|
| Electrical supply: | EU-one phase: | AC 220-240 V / 50 Hz / 16 A |
| | Residual circuit breaker: | One per shower required. Having a rated residual tripping current not exceeding 30 mA |
| | Mains supply fixed cord: | Min. 2.5 mm ² (rated for 16 A circuit) |
| Connectivity: | Internet connection: | WiFi 2.4 GHz required |
| | Circuit breaker: | One per shower required |
| Plumbing / Water: | Hot and cold water inlet: | Separate hot/cold inlet required. - 1/2" BSPP (G) pipe connection needed |
| | Temperature of inlet water: | Cold: +4°C to +30°C Hot: +40°C to +65°C |
| | Water inlet flow: | Min. 9 litres/minute hot and cold |
| | Water pressure: | Min. 3 bars/43,5 psi/0,3 MPa measured at the highest point of installation. Max. pressure 10 bars/145 psi/1 MPa |
| | Hardness of water: | Required: 3°dH-10°dH and preferred: 6°dH-10°dH or a total hardness of 110-180 mg CaCO ₃ /litres |
