

New home, new way of showering

Buying a new home presents a unique opportunity to make the home exactly like you want it. The bathroom plays a big part in that. With an Orbital Shower, you'll not only get a premium shower with minimal environmental impact, you'll also save money. You can often recoup your investment in an Orbital Shower in less than 2 years, while also increasing the value of your home.

Save large amounts of water and energy just by showering smarter

- Save on water and energy costs each month, track your savings in real time
- Future-proof your bathroom against increases in water and energy price
- Enjoy premium shower experience, guilt-free as long as you like
- Increase value of your property long term

Calculation example

	A house with traditional shower (SEK)	A house with Orbital Shower (SEK)
Price for a new home	5 900 000	5 932 000
Down payment (15%)	885 000	889 800
Mortgage interest rate (1,30%)	5 015 000	5 042 200
Water savings per year	-	8 100
Energy savings per year	-	8 136
Monthly financing cost	5 433	5 462
Monthly water and energy savings	-	1 353
Monthly net expenditure	5 433	4 109

Homebuyer example: Family with 3 kids and 2 adults taking 10 min showers/person/day with a water pressure of 12 l/min. The example uses the average energy price in Sweden, 1,50kr/kWh. Water and sewage is the average price for Typhus A villa in Sweden, 50 SEK/m³. They are calculated on the marginal cost of an Orbital Shower cost compared to a premium shower set (including head shower, hand shower, diverter, mixer, drain (30 000 SEK). Orbital Care plan, 10 year warranty, and consumables included.
